GenStar and Lockton Affinity Launch Architects and Engineers Liability Program

Comprehensive liability coverage for architecture, engineering, construction management, design build, interior design and surveying professionals

Stamford, CT, July 1, 2020 - GenStar announced the launch of its Architects and Engineers program with Lockton Affinity. GenStar President and CEO Marty Hacala commented, "GenStar is pleased to associate with Lockton Affinity. They are insurance specialists with a proven history of understanding the risks of architects and engineers."

The GenStar and Lockton Affinity Architects and Engineers Professional Liability program protects architecture, civil engineering, construction management, design build, electrical engineering, HVAC engineering, interior design, landscape architecture, mechanical engineering and surveying professionals. Liability limits up to \$2,000,000 will be available on a claims-made basis. Professionals will receive complimentary risk management and contract review assistance, as well as disabled partner replacement. "Industry professionals will receive comprehensive coverage. Architects and engineers can request a price indication for this new, customized offering, typically in several minutes or fewer," said Jeff Severino, Producer at Lockton Affinity."

The program is available in the following ten states: AZ, IL, KY, MI, MN, NM, NV, SC, TX, and WY.

The GenStar and Lockton Affinity Architect and Engineer Professional Liability program will be written on an admitted basis by GenStar's General Star National Insurance Company (GSN), which is rated A++ (Superior) by A. M. Best Rating Services, Inc. and carries an AA+ Insurance Financial Strength Rating from S&P's Global Ratings.

About GenStar

GSN is a wholly owned subsidiary of General Reinsurance Corporation, a member of the Berkshire Hathaway Family of Companies. General Star National is licensed in the District of Columbia, Puerto Rico, and all states. Insurance is placed with General Star National by licensed producers.
